The state of the s

LEGALITY OF ASSESSMENTS IS QUESTIONED; MAY BE BASIS OF APPEAL FROM REVIEW BOARD

greater salary during years of the general assessment, and has two assistants who do not serve in the off years. In view at the fact that coursell base complained all along of the necessity for géonomy in all departments, two general property assessments in a many years is not outring economy into practise, critics of the administration assert.

Some objections have been raised to the manner in which council proceeded in heaving appeals. Although the letter of the law was probably observed in giving property owners five days notice of the time set for consideration of assessments. Bad that the law contemplates a greater time for consideration of assessments would have been campleted by September 1. In order to complete the hearings on appeals he property owners been contemplates a greater time for complete the provisions of the Clark bill been carried out the assessments would have been defined and three mounts in which to hear and dispose of appeals, and would have had three mounts in which to hear and dispose of appeals, and would have head three mounts in which to hear and dispose of appeals, and would have permitted ample time to the tax-payers to prepare their cases.

"There was no haste in masking tic assessment" said a property owner long there are an assessment is said a property owner long there assessment is said a property owner long there assessed to the masking the assessment is said a property owner long there assessed to the masking the reminers and triends of the assessment. Said a property owner long there are an all three with property owner long that the assessment is said a property owner long that the assessment is said a property owner long that the assessment is said a property owner long that the assessment is said a property owner long that the assessment is said a property owner long that the assessment is said a property owner long that the assessment is said a property owner long that the assessment is said a property owner long that the assessment is said a property owner long that

"There was no haste in making the assessment." said a property owner today, "and there will probably be no hurry about reaching a decision in the appeals that have been filed, but the property owners who are most vitally affected had to prepare their case virtually between two days. To present an appeal effectually requires considerable time and thought. But for The Courier's enterprise in printing the full assessment list is would have been practically impossible for the agreed to \$2.100 and that on prepare this would have been practically impossible for the appeals were prepared assisted.

"Of course the reply to this might be that all property owners had to do was to fill out the blank prepared by enumers as \$250, and the process of the prepared was to fill out the blank prepared by council, but the blank gave no opportually be set forth inequalities of assessments, against which the principal complaints were made. I am convinced that had these appellants been given two or three weeks to study the matter, equicil would have been practically in the principal complaints were made. I am convinced that had these appellants been given two or three weeks to study the matter, equicil would have been should be matter. County the patements and the process with a mestanger of the regions as a present and the process of the process of the present years, work he announced that all property owners had to do was to fill out the blank prepared by counting a strong the prepared by counted by the present years, work he announced that all property owners had to do was to fill out the blank prepared by counted by counted by the present years work he announced that had these appellants been given two or three weeks to study the matter, equicil would have been able to a proper the process of the process of the process of the prepared to the fact that had the entering the fact that had the sea and thought. But the fact that had the sea and the fact that had the entering the fact that had the sea and the fact that had the entering
